

May 2009

Dear Valued Client:

It is with great pleasure I share this exciting news. We have aligned ourselves with Earth Friendly Chemicals, a company recognized for innovative technology by the federal government's Civil Engineering Research Foundation.

In the coming weeks, you will notice your toilet charge water is no longer blue, but green to symbolize our efforts to fully embrace the green movement and be proactive in offering our clients not only the safest, but cleanest environment. Safe for the Earth also means safe for you and your employees.

Earth Friendly Chemicals is leading the environmentally-safe revolution and their products are "green for a reason." The green color was chosen to emphasize the complex blend of environmentally-safe components. As a company committed to innovation, design and delivery, Earth Friendly Chemicals is dedicated to providing not only products that are safe for the environment but also quality products that perform at the highest level.

This is an exciting time for our company, and we are pleased to be offering you the latest in green chemistry through our new partnership. Please visit [www.earthfriendlychemicals.com](http://www.earthfriendlychemicals.com) to learn more about our partner's mission, products and ways to "get green" in order to "go green."

Your portable sanitation provider,
