### FAQs for Brides

#### Why a Portable Restroom Trailer?

The biggest reason is climate control. When you have a multitude of guests and everyone is dressed up, people need a place to freshen up and be comfortable. Providing air conditioning or heat as needed is a lifesaver at many weddings. The weather isn't always predictable, and a portable restroom trailer ensures your guests will have somewhere to retreat from it.

Another important consideration is sanitation. Many weddings do not have enough sanitation. Even the Center for Disease Control sees events not taking necessary precautions regarding cleanliness around the food, etc.

The overall purpose of having a portable restroom trailer is so that any member of your family, whether it is your grandmother, aunt, or brother dressed in a suit or tuxedo, has a clean, fresh, and overall positive experience. Providing a portable restroom trailer for your guests helps you bring the comforts of home to your wedding.

#### How big of a unit do I need?

For most weddings of fewer than 300 guests, the perfect size is a 3-unit portable restroom trailer.

For a wedding of less than 200 guests, a 2-unit or 3-unit portable restroom trailer is a perfect solution.

*\*Please note that the price of a 2-unit or a 3-unit is matched so closely that it may be only \$100 difference between the two. In addition, all units may be used as Unisex, but at most formal events they do go by the designated restrooms.*

For a wedding of 350 to 500 guests, a mid-size or large portable restroom trailer is the best solution. Mid-size units start with 5 stations (2 for women, 3 for men) and increase from there.

If you have guests in your party with physical challenges, you will want an ADA unit. The ADA +2 is available in both white with standard interior, or with designer interior.

*Please Note: If your wedding party is going to be changing clothes or getting dressed on location, you will want one of the larger public floor plans with a spacious powder room featuring a vanity and sinks. This will provide an adequate changing room for the wedding party.*

### What do I need to know about setting up the portable restroom trailer?

Regarding the best location for the portable restroom trailer, you will want to position it close, but not directly next to where the food and drinks will be served. It is essential to be within approximately within 50 feet of the electrical source so that your guests can use the hand wash feature, as well as restroom facilities without walking through wet grass, rough terrain, or gravel in sandals and high heels to get there.

### What utilities are required for a wedding?

A garden hose is required to either fill the fresh water tank before the event, or keep the hose attached to the trailer if the unit does not contain a fresh water tank.

For electrical requirements, a minimum of 2 dedicated outdoor plugs 110-volt with 20 amp breakers are needed. **The biggest challenge is arriving on location with the portable restroom trailer and there are no dedicated circuits. Plan this ahead of time and even have a licensed electrician assist in the planning to be sure there are dedicated lines. These are needed so that Air Conditioning can engage properly and all the systems run smoothly. You do not want to share the same electrical source with the DJ, Caterer, or Lighting for example.**

### Is there any outdoor lighting?

All restroom trailers provide muted outdoor lighting that will illuminate the stairs and handrails, while minimizing the attraction of outdoor insects.

### Can I put the portable restroom trailer underneath a large tent?

Yes, however the overall height of the tent must be at least 11' 6" tall. In this case, there is a venting pipe at the top of each trailer. You may need to have a contractor add a flexible pipe to the outside of the tent to prevent odors and to vent properly.

Please coordinate ahead of time and let us know you want to place the unit underneath a tent, so that we can coordinate arrival and logistics accordingly.

### Can I decorate the outside of the portable restroom trailer?

We do occasionally have elaborate wedding locations that want to decorate around the outside of the portable restroom trailer. In these cases the trailer is delivered in advance of the date so that trellises, a

**Phone:** 1-877-600-8645 • **Email:** [Info@PortableRestroomTrailers.com](mailto:Info@PortableRestroomTrailers.com) • [www.PortableRestroomTrailers.com](http://www.PortableRestroomTrailers.com)

---

large variety of trees, plants or flowers may be placed around it. If you are interested in decorating the portable restroom trailer please make sure to notify us so that we can plan the dates and times accordingly.

Mini-lights and other accents can also be added, but these need to be pre-approved. Do not affix tape, decorations or signage to the unit without pre-approval. There is a \$500 additional charge for this.

### **Are the supplies included?**

Yes. All paper towels, soft hand soap, and toilet tissue are included for a single day/weekend event. If you wish to add floral displays, special hand towels, other visual accents, or guest necessity baskets, you are welcome to do so.

### **What about the insurance on the portable restroom trailer?**

We provide the insurance on the trailer itself for daily events. No additional insurance is required, however we highly recommend that you research purchasing 1-day event insurance online that covers for accidents for your guests and other vendors on your property for that day. This insurance is very affordable, gives you peace of mind, and if there is any kind of accident with the caterer and food, or any of the guests, the insurance will cover it.

### **What about after the event?**

The pumper company will arrive the morning after your event and will need to access to the site the portable restroom trailer with no cars or vehicles parked in front. All decorations placed inside and out need to be removed out of the way of the trailer. We understand everyone will probably be sleeping and will be in and out as quickly as possible, without disturbing your guests!
